**(54) WASHING NET  
WITHOUT ENTANGLING**

(57) Abstract:

**PROBLEM TO BE SOLVED:** To enable sufficient washing and rinsing by keeping the expanded form of the net in washing wasings in a net for good water penetration into washings in the net so that a washing would not entangle with other washings to pull the net or washings would not gather in a corner.

**SOLUTION:** This washing net is made by enclosing a core 2 of a ringed plastic bar in a bias tape as a seamed margin of the washing net 1, to keep the washing net expanded. The core 2 is formed as straw-shape with a chamber inside and has a flexibility, so that it is light, and it is easy to float. The washing net is provided with a loop 3 in order to suspend it when the net is stored.
